UI/UX Designer / Front-end Web Developer Position (Full-Time)

Description:

Motion Metrics International is a fast growing high-tech company that provides advanced monitoring solutions to the mining industry. Our products apply machine vision and other sensor technologies to provide critical alarms and decisive information to all tiers of users in the mine's hierarchy.

We are looking for a highly motivated UI/UX Designer / Front-end Web Developer with up-to-date knowledge of industry trends in web development and cloud computing. The ideal candidate should be able to create attractive UI designs, taking into careful consideration the experience of the end-user, and help to implement their designs in a functional web front-end. They will be working closely in a development team consisting of both front-end and back-end developers.

Requirements:

- Advanced knowledge of Adobe Photoshop and Illustrator
- In-depth front-end coding knowledge of HTML/CSS, JavaScript, JSON, AJAX
- Excellent ability to present and communicate ideas
- Strong understanding of general design principles and web design
- Ability to learn new programming languages and web technologies as needed
- Strong organizational skills to juggle multiple tasks within the constraints of timelines.
- Minimum of 1-2 years of professional experience in UI/UX design and web development

Beneficial Skills:

- Experience with frameworks such as .NET, WCF, Entity, Bootstrap, Knockout.js, and AngularJS.
- Experience with cloud development in popular platforms such as AWS, Azure, etc.
- Knowledge of relational database systems, Object Oriented Programming, and web application development.
- Bachelor or advanced degree in web/graphic design or computer science

Please email your resume with cover letter to careers@motionmetrics.com. No phone call. Due to high volume of applications received only short-listed candidates will be contacted. We thank you for your interest in Motion Metrics.
